

Because we respect your time, we are entirely transparent.

Major features and starting costs. It's what every owner wants to know and we're glad to lay them out for you.

infoTouch is more than a common point of sale system:

- A Profit Operating System, giving owner/operators what they need to save time, increase profits and grow
- Bound Book is automated and maintained within the system for effortless reporting
- Tablet and countertop flexibility to enhance customer experience and increase sales
- Feature for feature comparable to those used in the largest retail chains - far beyond basic web-based terminals and light years past electronic cash registers
- Deep experience in specialized retail POS bringing software, hardware and payment processing into a single, efficient solution

| | FirearmOS Standard | FirearmOS Pro | FirearmOS Enterprise |
|--|---|---|---|
| | A standalone solution for stores seeking growth through enhanced visibility and efficiencies with a full-featured POS and Operating System. | A standalone or cloud-enhanced solution for stores wanting integrated accounting and enhanced reporting in a POS and Operating System to help save time, increase sales and drive profits higher, faster. | A multi-store, cloud-based network for operations desiring global control systems and administration from a centralized location along with reporting to mobile or desktop. |

Save your Time

Quickly Balance and Reconcile Accounts

- fast, accurate close-outs
- bank statement reconciliation
- credit card statement reconciliation
- GL reconciliation (Pro and Enterprise)
- discount reports

Reduce Inventory Management Time

- use standard reports to track and monitor inventory
- automated ordering for inventory replenishment (Pro and Enterprise)
- simplify and reduce manual cycle counting
- stored vendor profiles and ordering protocols
- vendor reporting

Automated Bound Book Reporting

- provides all information for FFL reporting compliance for transfer of ownership
- integrated with serialized inventory to automatically receive/dispose of items
- records weapon repairs as well
- tracks sales of items stocked and sold within other infoTouch reports as well

Serialized inventory tracked and maintained in system

- entire piece or components
- serial number request prompted at sale to avoid oversight
- tracked through inventory and registered into Bound Book registry

Automatically monitor sales progress

- daily/weekly/monthly sales reporting
- real-time decision support information
- automatic reports to meet regulatory/tax requirements
- gain insight into over who is selling with standard employee reporting

View Reports Wherever You Are

- all standard reports available on demand online
- fixed mobile and tablet device reports deliver information where and when it's needed

Dynamic Report Generation

- ideal for multi-unit operations
- rolls up area, region, global or subsets across most metrics
- all reports available via cloud to any user with credentialed login

Increase your Sales and Profits

Grow Sales

- get out from behind the counter with tablet inventory checks and checkout
- suggested sale items
- substitute items
- dynamically create or break down bundles and baskets
