

# Because we respect your time, we are entirely transparent.

We're built for you, the mission-driven operation that needs every cent to invest in delivering benefits to those who rely on you. Because we respect your time, we are entirely transparent. infoTouch is more than a common point of sale system:

- A Profit Operating System, giving owner/operators what they need to save time, increase profits and grow
- Tablet and countertop flexibility to enhance customer experience and increase sales
- Feature for feature comparable to those used in the largest retail chains - far beyond basic web-based terminals and light years past electronic cash registers
- Deep experience in specialized retail POS bringing software, hardware and payment processing into a single, efficient solution

	ThriftOS Standard	ThriftOS Pro	ThriftOS Enterprise
	A standalone solution for stores seeking growth through enhanced visibility and efficiencies with a full-featured POS and Operating System.	A standalone, cloud-enhanced solution for stores wanting integrated accounting and enhanced reporting in a POS and Operating System to help save time, increase sales and drive profits higher, faster.	A multi-store, cloud-based network for operations desiring global control systems and administration from a centralized location along with reporting to mobile or desktop.

## Increase sales and profits

### Grow your sales

- suggested sale items
- substitute items
- dynamically create or break down bundles and baskets

### Outstanding Customer Experience

- item status lookup
- item finder
- item photo
- mission/promotional video ads
- customer photo

### Loyalty/CRM Marketing Communications

- hierarchy identities
- special pricing/contracts
- categorical filters (multi-level)
- wholesale customer-enabled
- birthdate/key date tracking

- photo (recognition, verification)
- customized function definition
- mailing list generation
- layaway support

**Inventory Maximization**

- streamlines inventory tracking
- identifies profitability by department, row, shelf
- multiple unit (example: case/set/single)
- conceal/do not sell status
- dynamic pricing (adjustments, transform, matrix modify)
- vendor management

**Ordering Simplified**

- automated ordering for inventory replenishment
- stored vendor profiles and ordering protocols

**Integrated payment processing with added safeguards**

- infoTouch certified preferred payment partners
- creates enhanced reporting and accountability from sale through reconciliation
- offers enhanced security and theft abatement
- one call to us to get any issue into resolution

**Non-integrated payment processing**

- through non-infoTouch certified Merchant Services providers
- allows continuity with existing provider, integrated with ThriftOS Pro

**Internet Independent**

- always on: system retains full function whether or not internet is available
- local operating system and database

**Increase your Sales and Profits**

**Grow Sales**

- get out from behind the counter with tablet inventory checks and checkout
- suggested sale items
- substitute items
- dynamically create or break down bundles and baskets

**Outstanding  
Customer  
Experience**

- tablet mobility gets staff out in the store with customers
- line busting potential
- item status lookup
- item finder
- item photo

- through non-infoTouch certified Merchant Services providers
- allows continuity with existing provider, integrated with RetailOS Pro

**Employee Management**

- time clock (Pro and Enterprise)
- commission calculations
- multiple rate categories (per employee)
- contest, bonuses supported

**System always on and available**

- operates faster and more reliably than web-based systems
- internet independent: system retains full function whether or not internet is available
- local operating system and database

**Support Whenever, However you Need it**

- flexible support matched to your needs
- business hours, nights/weekends, 24x7x365 plans available
- affordable, stable monthly fees or hourly as needed

**System expands easily as the business grows**

**Software**

- each standalone system is identical, allowing familiarity between all locations
- new departments, products and stores simply and quickly added

- ThriftOS Enterprise weaves all locations together in the Cloud, providing reporting, visibility into and control of all, some or any single location

## Hardware

- infoTouch hardware optimized to software or other commonly available Windows hardware meeting system requirements
- tablets are durable with onboard scanners, wi-fi connected and perfectly aligned with software
- scanners, printers and cash drawers all run within the system software

## Integrations & APIs for Primary Systems

- accounting systems tie in directly to ThriftOS Pro
- most other ancillary software may also be integrated for full vision of entire operation

## eCommerce enabled

- omnichannel web interface (scheduled 2Q 2020)

## Remote System Management

- local or remote management controls of the stores through register, button, sales
- material controls as defined by management for each user in the network.
- able to push changes remotely to any or all nodes

## Easy for cashiers and management

### Intuitive screens/keys

- color code, scanned tag or a combination, all supported for pricing accuracy
- predefined functions (discounts, etc.)
- conditional fields
- foreign currencies
- closeout reminders
- advanced login controls

### EMV compliant

- yes, since 2015
- securely and seamlessly receives payments through EMV-enabled cards
